

A FEW REMINDERS FOR YOUR STAY AT THE RANCH

Welcome to Restoration Ranch. The building where you will be lodging has electricity that is generated by the sun. During the day the solar panels charge a group of large batteries. We then depend on those batteries to keep our fans and lights running all night. In order to do that we ask you to do the following.

- 1. Whenever you leave a room, shut off the lights and fans.**
- 2. When you don't need a light please leave it off.**
- 3. No charging of cameras, phones or other electronic devices. You can charge them at the pavilion where the meals will be served.**
- 4. No blow dryers, curling irons or other devices that use a lot of electricity. Again you can use those at the pavilion.**
- 5. Hot water. To get hot water, turn on fully only the hot water and wait until the hot water starts to come out. It takes some time in the showers far away from the heater. If it does not come, shut off water and then open only the hot fully and wait until it flows hot before turning on cold. When water is hot turn on cold slowly and only as far as needed to make the water temp suitable.**
- 6. Drink only water from the blue designated cooler or from bottles. Do not drink or brush teeth in water from tap.**
- 7. Please no paper products in the toilets, use the small trash cans provided.**
- 8. Make sure when windows are open that screens are adjusted properly to close off any openings. If not you could have visitors; flies, mosquitos, bats or tarantulas, etc.**
- 9. If a tarantula is spotted inside call for Gavin and he will remove it.**
- 10. The community here is safe, but we ask that you not leave the property without your team leaders permission and that you always have at least one buddy with you.**
